

# Biking $\rightleftharpoons$ Safety-in-numbers

- Active mobility  $\rightarrow$  health!
- More biking  $\rightleftharpoons$  safer biking
  - e.g. twice as many cyclists  $\rightarrow \approx 40\%$  safer

# Biking $\rightleftharpoons$ Safety-in-numbers

- Active mobility  $\rightarrow$  health!
- More biking  $\rightleftharpoons$  safer biking
  - e.g. twice as many cyclists  $\rightarrow \approx 40\%$  safer

# Biking $\rightleftharpoons$ Safety-in-numbers

- Active mobility  $\rightarrow$  health!
- More biking  $\rightleftharpoons$  safer biking
  - e.g. twice as many cyclists  $\rightarrow \approx 40\%$  safer

# Helmet laws

- Reduce collision death rate (?)
- Reduce safety-in-numbers feedbacks
  - e.g. driver awareness, infrastructure. . .

# Helmet laws

- Reduce collision death rate (?)
- Reduce safety-in-numbers feedbacks
  - e.g. driver awareness, infrastructure. . .

# WHICH WILL WIN?

- Effect sizes!
- Bikeshares as amplifiers!
- UN Sustainable Development Goals!
- Wild speculation about:
  - ... helmet safety campaigns!
  - ... interactions between cyclists and e-mobility!
